

FNF SURPLUS

Website Structure & Sitemap

Recommended Information Architecture, User Journeys & Integration Structure

Prepared for website planning / proposal development

1. Project Overview

The FNF Surplus website is being redesigned to improve lead generation, simplify product discovery, strengthen brand credibility, and resolve the existing product-data synchronisation issue. The client operates as a B2B business serving secondary markets in perfume retail, laundry manufacturing and incense-stick manufacturing, with target markets across India, Africa, Central Asia, Latin America and Indonesia.

The website should therefore be structured less like a conventional corporate brochure and more like a B2B catalogue and enquiry platform.

Key Requirements from the Kickoff Form

- Redesign of the existing website.
- Primary objectives include lead generation and building brand credibility.
- Product catalogue with multiple product categories.
- Lead forms with CRM auto-sync.
- ERP / inventory integration.
- WhatsApp / live chat functionality.
- English language website.
- Full on-page SEO setup.
- Quarterly / annual website maintenance or AMC.
- Matrix Bricks to manage post-launch content updates as part of AMC / retainer.

2. Main Navigation

Recommended primary navigation:

- Home
- About Us
- Products
- Insights
- Contact Us
- Enquire Now — persistent primary CTA
- WhatsApp — persistent utility CTA

Products Dropdown

All Products

- Essential Oils
- Aroma Chemicals
- Fragrances
- Flavours
- Recycled Fragrances
- Miscellaneous

3. Recommended Sitemap

The following structure balances the client's requested 6–15 page range with reusable CMS templates for products, applications and insights.

Section	Recommended Pages / Templates
HOME	Landing page
ABOUT US	Our Story; Mission & Vision; Why FNF Surplus
PRODUCTS	All Products; Essential Oils; Aroma Chemicals; Fragrances; Flavours; Recycled Fragrances; Miscellaneous; Product Detail
INSIGHTS	Industry News; Sustainability; Market Insights; Product Updates; Article Detail
FAQ	Landing page
CONTACT US	Landing page
UTILITY / LEGAL	Search; Thank You; 404; Privacy Policy; Terms & Conditions; Cookie Policy; Disclaimer

4. Homepage Structure

Section	Purpose / Content
01 — Hero	Clear value proposition around surplus fragrance and flavour materials. Primary CTAs: Explore Products and Submit an Enquiry. Secondary CTA: Sell Your Surplus.
02 — What FNF Surplus Does	Source, Repurpose and Empower messaging explaining the business model.
03 — Product Categories	Essential Oils, Aroma Chemicals, Fragrances, Flavours and Miscellaneous.
04 — Live / Available Inventory	Selected current inventory pulled from the product database / integration, with Enquire CTAs.
05 — Why FNF Surplus?	Cost-effective sourcing, surplus inventory, quality focus, sustainability, global sourcing and faster procurement.

06 — Applications / Industries

Perfume & Fragrance, Laundry, Incense / Agarbatti and other relevant manufacturing applications.

07 — Sustainability

Circular economy story and giving valuable materials a second life.

08 — How It Works

Browse → Enquire → Verify → Procure.

09 — Featured / Recently Added Products

Dynamic product carousel or grid.

10 — Global Reach

India, Africa, Central Asia, Latin America and Indonesia.

11 — Latest Insights/Blogs

Industry, sustainability and market content.

12 — Lead CTA

Looking for a specific material? Submit Your Requirement / Sell Your Surplus.

5. About Us (Added Recommended sections)

- Company introduction

Our story

Mission and vision

Industries served

Global markets

Certification

Leadership / team

- Life
- ESG
- What is BRSR?
- Why FNF Surplus is different
- Circular economy approach
- Commitment to Sustainability
- Net Zero
- Primary CTA

6. Products & Catalogue Architecture

(Have included all Filters, Let me know preferred filters and sections)

Products should be the core functional module of the website. The catalogue should support dynamic product pages rather than a single static product list.

Product Listing Page

- Search by product name, internal product code or manufacturer.
- Filter by category.
- Filter by manufacturer.
- Filter by availability / stock.
- Filter by quantity where applicable.
- Filter by application or product type where data is available.
- Display enquiry CTA on every product.

Product Card

- Product Name
- Category
- Manufacturer
- Available Quantity / Stock
- View Details
- Enquire

Product Detail Page

- Product name
- Category
- Manufacturer
- Product code / internal product name
- Available stock
- Product description
- Application
- Packaging
- Origin / location where available
- Grade / specification where available
- Relevant documentation
- Request a Quote form

7. Insights / Blog

- Industry News
- Fragrance & Flavour
- Sustainability
- Market Insights
- Product Updates
- FNF News

A reusable article template should support SEO metadata, featured image, category, related articles and contextual product CTAs.

8. Contact & Enquiry Structure

The contact experience should classify enquiries at the point of submission:

- I want to buy materials
- I want to sell surplus
- General enquiry

Depending on the selection, the form can display relevant fields and pass the enquiry type into the CRM.

9. SEO & Content Structure

- Full on-page SEO setup as requested in the brief.
- SEO-friendly category URLs.
- SEO-friendly product URLs.

- Application / industry landing pages.
- Metadata and heading structure.
- Internal linking between products, applications and insights.
- FAQ structured data where appropriate.
- XML sitemap and indexation controls.
- Search Console / analytics setup subject to access and confirmation.
- Redirect mapping from the existing website to the new URL structure.

10. Page / Template Scope

Recommended Scope Model

Keep the main information architecture within approximately 12–15 core page types, while using reusable CMS templates for product categories, individual products, applications and insights. This allows the catalogue to scale to hundreds of products without treating every product as a separately designed page.

Core Launch Pages

- Home
- About Us
- Products
- Insights/Blogs
- FAQ
- Contact Us

Reusable Dynamic Templates

- Product Category Template
- Product Detail Template
- Insight / Article / Blogs Template

System / Legal Pages

- Search Results
- Thank You
- 404
- Privacy Policy
- Terms & Conditions
- Cookie Policy
- Disclaimer

11. Final Recommendation

The new FNF Surplus website should be positioned as a B2B surplus-material sourcing platform rather than a standard corporate website. The strongest differentiator will be a well-structured, searchable product catalogue connected to the client's operational data.
